

Background

Welcome to Topsearch

Mr. Peter Cheek founded Topsearch in 1984 when he set up Topsearch Industries in Hong Kong. In 1985, Topsearch Industries commenced production of PCBs in its Hong Kong facility.

In 1987, Topsearch Industries entered into a joint venture agreement with Fisher and Paykel Pacific Limited (F&P) to set up PCB manufacturing facilities in China. Topsearch established its production facilities in Shekou, Shenzhen, China in the same year, yet commenced production only a year later.

In 1992, Topsearch strategically centralized all its production activities at its Shekou, Shenzhen, China facility to take advantages of more competitive labor and overhead costs.

Topsearch Shenzhen was awarded the ISO 9002 certification in 1994, while Topsearch Hong Kong awarded the certification in 1995.

In 1996, Topsearch Industries acquired F&P's interest in Topsearch HK, making Topsearch HK became a wholly owned subsidiary of Topsearch Industries.

In 1999, both Topsearch HK and Topsearch Shenzhen were awarded the QS 9000 certification.
